Experience

TAWSEEL

[HTTPS://WWW.TAWSEEL.SA](https://www.tawseel.sa)

Managing Director

May 2016 – November 2017 - Wadi Makkah Startup Center, Umm Al-Qura University, Makkah, Saudi Arabia

I was Responsible and playing multiple roles since we established Tawseel Startup with small team members. I was involved on developing the system since Tawseel was a research project in Makkah Techno Valley Company. Additionally I was leader and involved on operation marketing , finance and customer support teams. Mainly I was responsible for system analytics reports.

We grow up by the time and had more team members and I was the managing director of Tawseel.

TAWSEEL

[HTTPS://WWW.TAWSEEL.SA](https://www.tawseel.sa)

On-demand delivery platform that matches clients who have items to ship with freelance drivers available to deliver parcels, packages, food, etc. .

I was responsible developing the platform back-end and front-end system as well as android development. Along with managing the bussiness team till we established Tawseel Startup

Tawseel was among TOP 15 Finalists at Startup Istanbul

<https://twitter.com/istanbulstartup/status/926858874589798401>

MAKKAH TECHNO VALLEY COMPANY

<http://wadimakkah.sa>

Software Engineer

August 2015 – September 2016 - Umm Al-Qura University, Makkah, Saudi Arabia

I was responsible on front-end and back-end development for Crowdetta, Ejadah Confex Saudi Arabia Startups on Map and Tawseel projects and IT team leader using Scrum software development framework (Agile Methodology) on Crowdetta Project and Tawseel Project. and Software Tester on Eventyzer and Tawseel Projects

Eventyzer

<http://eventyzer.com>

Eventyzer updates in sub-second realtime. Don't make your event-goers wait, allow the instantaneity of Twitter drive event engagement. You can run your event on our server and use all current features like, White and Black users lists, Presentation views custom UI with your favourite colors and screens.

Ejadah Confex

<https://play.google.com/store/apps/details?id=org.gistic.ejadah>

EJADAH CONFEX ACE Events is proud to present Ejadah Confex, the first of its kind Saudi Creative Economy Exhibition and Conference taking place in April 2016 at the Bay La Sun Hotel in King Abdullah Economic City. The event aims to boost the diversification of the Saudi economy in different methods focusing on an improved creative local society and initiatives along with raising awareness about Intellectual Property.

I was responsible for developing the back-end and front-end system using [Backendless](#).

- [Android App](#)

- [IOS App](#)

Saudi Arabia Startups on Map [Postpone]

<https://www.crowdetta.com/saudi-startups>

Saudi Arabia Startups – The Saudi hi-tech industry on a map. Discover startups, investors and more. Mapped in Saudi Arabia provides free and easy access to data and reviews about the Saudi high-tech ecosystem.

Crowdetta [Postpone]

<https://www.crowdetta.com>

Crowdetta is a platform combines Crowdfunding and Freelancing into a single platform where we collaborate to fund our projects and select a freelancer who makes our idea comes true.

I was responsible developing the platform back-end and front-end system

Tawseel

<http://tawseel.sa>

On-demand delivery platform that matches clients who have items to ship with freelance drivers available to deliver parcels, packages, food, etc. .

I was responsible developing the platform back-end and front-end system as well as android development. Along with managing the business team till we established Tawseel Startup

Tawseel is an On-demand delivery platform that matches clients who have items to ship with freelance drivers available to deliver parcels, packages, food, etc. .

ONE KSA PLATFORM

<https://play.google.com/store/apps/details?id=com.ahmadssb.oneksa.jeddahamanah>

October 27, 2014

Stopped working on this project

One KSA Platform is one system to connect all malls in Saudi Arabia with one app that provides:

*** App Content:**

- View List of malls in Saudi Arabia based on your location.
- View list of promotions by mall (events, conferences, special offers).
- list of promotions of stores at the selected mall.
- List of facilities and stores at the selected mall.
- Indoor Navigation to selected facility or store using BLE Technology and Navibees and Indoor System.
- Using NFC Technology on phones to charge and pay in stores (Money or points system) and connect it to user account.

*** Backend Content:**

- System Admin Panel:

- - create new mall account.
- - create new mall's Indoor Map.

- Mall account can;

- - add multiple stores and their information
 - - add multiple Mall Promotions
 - - add multiple Stores Promotions
 - - add multiple stores
 - ... etc
-

OZBAH (IN PROGRESS)

July 17, 2015

Ozbah (العربة) means a place (room, garden... etc) where a friends and family usually hangout. The application is dedicated to arrange who have the right to play on the next game (any game of 2 or 4 players) and arrange the current and waiting list players. based on the time the presence of the player. where the losing team will move to the end of the waiting list and the first players will jump to current list.

This application was developed mainly for my friends and family when I found that when there are so many people at the same place they usually missed their game or when 2 expert players arrange with each other

every time. To avoid these situations I developed this application (where all these rules were written and approved by all members of our Ozbah)
